

Advanced Maritime Security Masterclass

COURSE FEES:**S\$ 1,284.00 (Inclusive GST)****DURATION:****2 Days**

Introduction

The International Ships and Port Facility Security (ISPS) Code came into effect on 1 July 2004 as mandated by the International Maritime Organization (IMO). It has posed significant implementation challenges to the maritime and port industries throughout the world. Over the years, IMO has provided further guidance in the form of Maritime Safety Committee (MSC) Circulars and model training courses to update and to amplify the ISPS Code.

Advanced Maritime Security Masterclass aims to provide Government and Industry practitioners whom are responsible for the management of the ISPS Code with a consolidated and up-to-date source of guidance material including best practices adopted by international/regional organizations, governments and the industries. The Masterclass materials take reference to the various MSC Circulars, Standards of Training, Certification & Watchkeeping (STCW) Code as amended, August 2010 and IMO Model Courses 3.19, 3.20 and 3.21, 2011/2012 Edition. The Masterclass includes practical planning and application sessions to reinforce the theory learnt.

Objective of Course

At the end of the course, participants would be able to understand/apply:

- Challenges in the implementations of the ISPS Code
- Latest updates on the various international legislative and regulatory frameworks
- Best practices adopted by International/Regional Organizations, Governments and Industries
