20 May 2014 to 19 May 2018

Introduction

Port Facility Security Officer (PFSO) Course aims to provide the skills and knowledge to those who may be designated to perform the duties and responsibilities of a Port Facility Security Officer, as defined in section A-2.1.8, sections A/B-18.1 of the International Ship and Port Facility Security (ISPS) Code.

Objective of Course

This course covers the requirements defined in sections A/B-18.1 of the ISPS Code and International Maritime Organization (IMO) Model Course 3.21 (dated 6 Sep 2003). At the end of the course, participants will be able to:

- Assume the responsibilities and perform the duties of the PFSO.
- Implement and ensure the maintenance of the Port Facility Security Plan.
- Conduct security inspections of the ship to ensure adequate security measures.
- Understand the conduct of security assessment and audits.
- Conduct training, drills and exercises in accordance with the ISPS requirements.
- Enhance security awareness and vigilance.

Course Coverage

The course covers the following topics:

- Maritime Security Policy, Legislation, Codes and Conventions
- Maritime Security Responsibilities
- Security Administration
- Development and Implementation of an effective Port Facility Security Plan
- Port Facility Security Equipment
- Recognition of Behaviour that threatens security
- Recognition and detection of weapons and dangerous devices
- Access and Searches
- Port Security Incident Reporting
- Conducting the security audits, port facility assessment and inspections
- Training Requirements, Emergency Preparedness, Drills and Exercises

Pre-Requisite

Employed or engaged as a ship's complement in any capacity on board ships which are required to comply with the ISPS code.

Certification

Port Facility Security Officer Course certificates will be awarded to the participants who have successfully completed the course.
